

QUALITY POLICY

The quality policy shall be appropriate to the purpose of the organization and be communicated and understood within the organization. It shall also be reviewed for continuing suitability.

Following is the Quality Policy of Subseatec, which applies to Subseatec S. AB, all the companies which are part of Subseatec S. AB and all business ventures of Subseatec S. AB:

Subseatec supplies products and services to customers within industries with high demands on quality such as energy, defense and marine industries. Each product has a high degree of refining mainly with origin from a steel forging.

We aim for a strong market position to become the obvious choice to our customers. We will reach this position by working in effective processes and through development in collaboration with our customers and suppliers.

Our employees are aware that quality is everyone's responsibility and we work focused on continuous improvement by learning from earlier experiences and by developing each employee's competence.

We review our Quality policy along with whole Quality management system once a year, preferably during the internal revision.

Subseatec strives to grow continuously in accordance with the strictest Quality standards, in accordance with the ISO 9001:2015 Standard.

Peter Jansson, Managing director Subseatec S AB
